Sequence 4, Application US/09975132A

Sequence 4, Application US/09975132A

Publication No. US20020182672A1

GENERAL INFORMATION:
TITLE OF INVENTION: Enhanced Secretion of a Polypeptide by a TITLE OF INVENTION: Microorganism

FILE REFERENCE: GC636-2

CURRENT APPLICATION NUMBER: US/09/975,132A

CURRENT FILING DATE: 2000-10-09

PRIOR FILING DATE: 2000-10-10

APPLICANT: Shlesinger, Michael
APPLICANT: Shlesinger, Michael
APPLICANT: Shlesinger, Michael
TITLE OF INVENTION: Algorithmic Design of Peptides for Binding and/or Modulation of the TITLE OF INVENTION: Algorithmic Design of Receptors and/or Other Proteins
FILE REFERENCE: 01561-0003-000500
CURRENT APPLICATION NUMBER: US/09/490,702B
CURRENT FILING DATE: 2000-01-24
NUMBER OF SEQ ID NOS: 96
SEQ ID NOS: 96
LENGTH: 15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             GENERAL INFORMATION:
